

SAMPLE ESSAY

During my childhood, I did not have a specific goal. I wanted only All-my thinking was directed to be at the top of my class and get the highest grades. My father wanted me to become an engineer, but he never forced me to choose this career, and it this was not my ambition. I always remember my biology teacher, who gave a class about the human body and which made me realize that how the human body is remarkable, with many diverse systems that could never be artificially reproduced. That class day made me fascinated me by the human body and made me love biology. My love of the human body is just one of my reasons for choosing medicine.

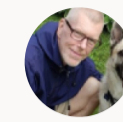

The word "very" is an intensifier that modifies your adjective "challenging." Consider removing the intensifier or replacing the adjective to sharpen your writing.

After graduating from high school with an outstanding GPA, I applied to medical school in Saudi Arabia. It was very challenging to get-in because there were so many students applying, but applied medical schools and the seats were limited. My effort finally paid off when I was accepted into the Faculty of Medicine at King Abdulaziz University. I did not have any clinical experience in the first three years of college. However, I spent a lot of time doing lab work during those years, which enriched my understanding of the human body. Then, in the last three 3 years, I started the clinical sessions with experienced doctors, and we did rounds with them to learn about how-to-do the clinical examination and to engage in the management plan. During these years, my interest in pediatrics emerged, and my Pediatric has started. My interest grew has-grown even more after taking pediatrics Pediatric courses in my fourth and fifth years. I love children and I believe I know how to handle them. Also, the way-how we approach the diagnostics makes this specialization very interesting to me. To be more specific, finding the right diagnosis can diagnostics could be difficult and critical at the same time, requiring which-requires a careful and accurate examination of the patient's symptoms.

The correct phrase is "to make somebody do something".

During my residency, I worked in the pediatric ward, clinics, PICU, and NICU, which helped-me exposed me to a variety of cases. On-calls were is part of the pediatric program, and I faced many stressful on-calls due to the high load at to our hospital; these on-calls provided me with the ability to cope with pressure and stressful situations. Also, they made me realize that a doctor's job is not just prescribing drugs but also that showing empathy and compassion, being which is the key to delivering an effective care. This experience greatly enriched my clinical skills and knowledge.

"Diagnostic" is a technique used in medical diagnosis while "diagnosis" is the identification of the nature and cause of an illness.

Having worked in Saudi board help to see many of immunodeficiency cases such as Bruton's disease, patient need admission frequently to receive intravenous immunoglobulin (IVIG) otherwise he is doing good. Also, I remember in one of my on-calls a father with severe came-that-he had-Severe combined immunodeficiency (SCID), and he had survived a after bone marrow transplant. All three and-all of his 3 sons have SCID; two of them have already had bone marrow transplantation, and the third 3rd son was booked for a bone marrow transplant. The management outcome for immunodeficiency diseases is promising, which made me want to pursue in this subspecialty. In addition, there are few pediatric allergy immunology consultants in Jeddah, whereas while there are many patients with immunodeficiency diseases.

"Whereas" is used to express a contrast between two facts or two ideas and means the same as "on the other hand." "While" introduces a time clause. It means "at the same time" or "during the time."

The pediatric Pediatric allergy and immunology fellowship in Canada provides a good prospect for trainees, offering the-trainee-and-implies direct contact with patients, which is very important. Also, the program is well established, with good exposure to a variety of cases. Therefore, I am, therefore, would-feel obliged to seek be-able-to-secure admission to in your prestigious program.

For formal speeches, scholarly papers, and the like, sentences should be re-written to avoid starting any sentence with "Therefore."
